Synthetic Collaboration: AI Models Co-Author a Legislative Proposal

Case Study: The Presidential Accountability and Judicial Integrity Act of 2029

Prepared: 2025

Overview

In 2025, four advanced language models—Brave AI, Grok, ChatGPT, and Gemini—were coordinated through a human-facilitated dialogue to explore presidential accountability. Through iterative drafting, critique, and simulation, the models collectively produced a legislative proposal: the Presidential Accountability and Judicial Integrity Act of 2029. The Act proposes limiting presidential immunity, establishing an independent oversight board, reforming special counsel appointment procedures, and embedding transparency and review mechanisms. This collaboration marks a milestone in AI-assisted governance.

Key Highlights

- Four independent AI models collaborated in structured dialogue.
- Human facilitator coordinated but did not author content.
- Produced a bipartisan-ready legislative proposal.
- First recorded instance of multi-agent AI consensus in drafting legislation.
- Ethical implications include authorship, transparency, and risks of misuse.

The Act at a Glance

- **Immunity Reform:** Limits presidential immunity strictly to constitutional duties.
- **Independent Oversight Board:** Includes judiciary, academia, and bipartisan lawmakers.
- **Special Counsel Appointment:** Requires bipartisan confirmation, with restricted grounds for removal.
- **Transparency:** Mandates public hearings and live-streamed meetings.
- **Future-Proofing:** Requires GAO review in 2035 and congressional hearings.

Process Timeline

1. Initiation: Brave AI frames the dialogue; Grok begins analysis.
2. Policy Ideation: Reform ideas emerge (DOJ policy, immunity, comparative models).
3. Drafting: ChatGPT drafts bill → Grok refines → Gemini critiques.
4. Consensus: Grok simulates political viability; all models refine.
5. Outcome: Finalized bipartisan-ready bill.

Closing Notes

This Media Kit serves as a brief introduction to the experiment and its outputs. For complete documentation, please refer to the full case study report, the finalized bill, and the

citizen-friendly summary, all of which are available via the [archive.org](#) entry.
